

SHIPPING

SUPERIOR DELIVERY

- Many units can be shipped in as little as one working day
- Some options and variations may increase delivery time

Use this delivery schedule as a general guide for standard PHD products. Certain options and unit variations can increase delivery time. This schedule represents the number of working days under normal situations to process, assemble, and ship standard units from the day PHD receives an order from your local distributor. Consult PHD for deliveries on non-stock units, specials, non-standard platings, large quantities, or on specific critical items.

IMPORTANT!

NOTE: Orders containing multiple product types are shipped at one time and are scheduled based on the longest lead time item. Partial shipments of shorter lead time items are made when requested on original order. Most PHD products are built to order. With our extremely quick deliveries, the order may be in production within 1 to 2 days of receiving your order. Please bear this in mind when changing, revising, or canceling an order.

REBUILD REUSE RECYCLE:

PHD's rebuild program can save your facility training, additional work load, possible tool requirements, and facility space to perform the repairs. In addition, you will receive a 12 month "like new" warranty.
